

Changes to Argus US Products report & data effective 8th June 2006

Argus is launching new assessments for gasoline and distillates on the US Gulf Coast that reflect the volume-weighted average of deals done throughout the entire trading day. Argus currently assesses the market as the low and high of deals done throughout the trading day, and our low and high assessments will remain in the reports and that methodology is unchanged.

Below is the summary of old style Argus G-Codes and new style Argus CSV codes:
