

## Changes to Argus European Products report and data feed effective 14 Jan 2008

Argus is including the middle distillate differential prices to Ice Gasoil Average from 14 January 2008. This will also mean a redesign of the main report layout to allow inclusion of these values in the report. Start dates below are listed as 3 Jan 2006 because Argus has this previously unpublished data available.

The legacy G-codes for these series will be:-

Note also that for all PA codes above and for all appropriate price types (both the new ones above and existing outright bid/ask pt=1 or 2), the differential base roll column (field) of the data CSV files will now include the relevant Ice Gasoil Average contract month value that was used for the differential calculation. This value was previously zero and will now be in the range 1 to 12 inclusive, (this change has started immediately in existing CSV files).
