

Changes to Argus Crude effective immediately (15/16 may 2008)

Current data series published as MOG swaps and Oman swaps are no longer active and the data series are being stopped, last published data is for 15 May 2008 (today). The existing Oman forward assessments are changing differential basis, previously differential to Oman MOG formula, they will be differential to Dubai swaps (same month) from 16 May 2008. The previous Oman MOG formula differential is now being included as a separate new assessment, it is still a component of the Oman forward methodology.
