

Changes to Argus European Natural gas effective 2 September 2008

Argus will resume publishing Ice Natural gas quarter and season assessments. There will also be one new monthly assessment for 12 month forward. These assessments will appear in the DNG data module. Argus collects this data from Ice. Not all assessments will be available at all times, depending on the Ice publishing schedule. The values published in the evening CSV file will be provisional numbers, any changes or corrections will be published on the following working day as corrections. The values published in the G-code format file on the this date will switch from being the latest figures at the time of publication, to the just confirmed values for the previous day's trading.

The csv format codes are:
