

Changes to Argus US Products effective 2 September 2008

Argus is adding two new data series to distinguish the New York Harbor CBOB gasoline RVP grades. The existing series will continue as the "continuous series" having either Summer or Winter grades which ever is prevalent at the time. Two new series for Summer Grade and Winter grade are being added which will be seasonally discontinuous series with each being assessed for only part of the year.

New Summer/Winter CSV codes in the DHP module are
