

Changes to Argus Coal Daily International legacy data feed

Postponed to 15 December 2008

On 1 October the date markers for the following series will be switched from the publication date of the Coal Daily International to the publication date of the original data source (Argus Coal Daily). This data is close of day data for the US coal markets and will henceforward be labelled to reflect that close.

On 30 September 2008 there will be no Nymex or Central Appalachian coal data to avoid having two data sets for 1 October 2008. Date-adjusted data history is available on request.

This only applies to the Argus legacy G-code data files and not to the new CSV data files.

The legacy codes affected are:-
