

Please note that the start dates of these codes have been amended, please see tables below.

Changes to Argus Crude data feed effective 4th March 2009

Argus is introducing two assessments to the Argus Crude data feed; Ice Brent marker month and North Sea partial VWA month.

The North Sea partial VWA assessment will be a discontinuous series. When no 21-day North Sea trade is reported to Argus as having taken place in the 4.29-4.30pm London period, no partial VWA will be calculated and therefore published.

The Ice Brent Marker is the Ice contract that would set North Sea Dated when there is no partial VWA available.

The CSV codes are as follows:

G-code	PA-code	Time stamp	Price type	Continuous forward	Description	Differential basis	Start date	End date
GCIP6254M	PA0006254	6	8	1	Ice Brent marker month	-	28-Jun-2007	
GCNS6255M	PA0006255	6	8	1	North Sea partial VWA month	-	03-Jul-2007	

The legacy g-code codes are as follows:

G-code	Time Stamp	Description	Price type	Start Date	End Date
GCIP6254M	16:30HRS	ARGUS, ICE BRENT MARKER, MONTH 1	Midpoint	28-Jun-2007	
GCNS6255M	16:30HRS	ARGUS, NORTH SEA PARTIAL VWA, MONTH 1	Midpoint	03-Jul-2007
