

Changes to Argus Asphalt Data file availability effective 25 September 2009

Argus is making the Asphalt CSV data file available at 23.30 EST (or EDT) effective this Friday. Clients taking the file on Mondays at 11.00 EST (or EDT) will still be able to retrieve the file as latestdia.csv on Mondays at this time. Clients can change their routines at their own convenience to take advantage of the earlier availability of the data.

The dated file names (yyyymmdddia.csv) will now match the date of the report files (Fridays) instead of having the Monday date.
