

Changes to Argus Crude report and data feed effective 10 October 2009

Corrected code

Due to constant revisions to Canadian Postings numbers, both during and after the end of any given calendar month, Argus will introduce a monthly Canadian Postings retrospective series which will contain the final revised versions of all Canadian Postings numbers. These series will be published around the 10th day of every month in order to include all revisions, some of which tend to take place during the first few days of the following month. So for example, a table containing all revised numbers for the month of September will be published on or around 10 October.

The following changes will be applied to CSV datafeed of DHC module:
