

Changes to Argus European Products report and data feed effective 11 February 2011

Argus is resuming publication of Straight run M-100 Fuel oil cif NWE series as outright high and low values effective 31-Jan-2011. Argus switched to assessing differential high and differential low price types in March 2003. This change reinstates outright prices (price types 1 and 2) publication along with existing differential series (price types 6 and 7). Please note, that historical data for high and low values will have no data points between 31-Mar-2003 and 11-Feb-2011.
