

Changes to Argus Natural Gas Americas effective 9 May 2011

Argus is adding everyday indexes to the Argus Natural Gas Americas data files according to the following methodology :-

Flow-date series (everyday index data series)

A separate flow-date series will show the volume-weighted average only, dated according to flow-date instead of transaction date. These series are in addition to the existing day-ahead index series. These “everyday” series forms a continuous daily record of the applicable index for each calendar day of the year. **The start dates below will be 01-Jan-2011 and not 02-May-2011 as previously announced.**

Back fill data from 1 January 2011 to 8 May 2011 will be available on request.

The following data codes will be added to the DNGA data module.
