

Changes to Argus European Electricity effective 4 October 2012

Argus has suspended its price assessments for the Romanian over-the-counter (OTC) power market because of a lack of trading activity following recent announcements by the regulator in relation to the country's new Electricity Law. Argus will keep the situation under review. Assessments will resume should OTC trading re-emerge to the extent that prices can be assessed in line with the stated methodology. Argus European Electricity will continue to provide daily coverage of the Romanian spot market, auction results and other market-relevant news as part of its in-depth coverage of Southeast Europe.
