

UPDATED: Changes to Argus Crude report and data feed, effective 22 October 2012

Argus is introducing Ice Brent NX series to the Argus Crude report from 22 October 2012. The 'Ice Brent NX marker month' (PA0011295 and associated G-codes) will be a discontinuous series, published alternately with existing time series 'Ice Brent marker month' (PA0006254 and associated G-codes). This represents the gradual migration to Ice Brent NX contracts, which will eventually supercede Ice Brent.

UPDATED: PA00011292, PA0011293 and PA0011295 will be delayed until further notice. Argus will re-announce to confirm when they become available from Ice. PA0011294 data will be published as previously described.

The DLC data file in the DCRDEEU FTP folder of ftp.argusmedia.com will contain the following PA codes:

PA-code	Time stamp	Price type	Continuous forward	Description	Differential Basis	Start date	Unit	Category	Frequency
