

Changes to Argus Freight effective 5 June 2013

Two data assessment labels have been identified as inaccurate to the published methodology. The following code description changes are being applied immediately to rectify this. The assessment was always for US Gulf this is only a code description change, no published data is affected by this update.

These codes are in the /DFR folder of the <ftp.argusmedia.com> server

PA Code	Old Description	New Description
PA0003857	Dirty UK Continent-US Atlantic 135kt \$/t	Dirty UK Continent-US Gulf 135kt \$/t
PA0003858	Dirty UK Continent-US Atlantic 135kt WS	Dirty UK Continent-US Gulf 135kt WS

No legacy g-codes affected

Argus is discontinuing support for the legacy g-code data feed, the last data files in this format will be published for data date Friday 28 June 2013. Clients using legacy g-codes should contact their Argus account executive for advice and support in migrating to the current CSV data feeds using Argus PA-codes. A mapping of legacy g-codes to PA-codes is available. Argus can provide historical data in CSV format by individual codes or by data sets (all Argus European Natural Gas for example). The Argus CSV format contains all the information of the old legacy series plus additional data to determine the price contract or pricing basis for prices expressed as differential data series.
