

Change to Argus Publications time stamp meta data effective 21 October 2013

Argus is renaming a time stamp to remove some confusion with its description and to enable a more generalised use of this time stamp with Argus price reporting. The existing time stamp ID = 9 is currently named “Nymex close”, from 21 October this will be renamed to “Exchange settlement”, the exact exchange would be detailed in the methodology of the assessment.

This time stamp (9) applies to the following data modules and codes, the assessments will not change, the only change is the label for the time stamp used not the time stamp itself.

Note The PA codes are listed below for reference only.
