

Changes to Argus US Products, effective 07 October 2014

Argus recently began to publish RVP factors for gasoline assessments in the Argus US Products data feed. To simplify processing of this data, a mapping has been made available to join each gasoline assessment code to its respective RVP code. This file is called RVP_Code_reference.csv and can be found in the /DOCUMENTATION folder of ftp.argusmedia.com.

This file will be updated when new gasoline assessment codes and their respective RVP factor codes are launched.
