

Argus database maintenance period effective 11 March 2017

Argus is scheduling a central database maintenance period for up to 48 hours from 9am GMT on Saturday 11 March 2017. All users are urged to download data for 10 March 2017 before this time or otherwise wait until after 9am GMT Monday 13 March 2017. The website (direct.argusmedia.com), web-services (data API) and FTP site (ftp.argusmedia.com) will be offline during this maintenance period.

We anticipate that the maintenance will take less than the 48 hours noted above to complete.
