

Changes to Argus International LPG FTP feed effective 13 July 2021

For the end users convenience, Argus is adding calculated midpoints and differential midpoints (Price Types 8 and 3) to Argus International LPG FTP feed. Those midpoints are not part of the printed publication where only high and low values are published, but can be derived as arithmetical average of those two already delivered in the FTP CSV files. The midpoints are already available in API feeds as well as on Argus Direct online platform.

Historical data from the Start date onwards is available upon request. The change will affect dpg.csv, dpgasia.csv and dpgeurope.csv files in \DLPG folder.
